

How to Clean Equinox

Bella-Dura® Fabrics

Because Bella-Dura® fabrics are made with solution-dyed yarns, and its inherent stain resistance will never wear off, cleaning Bella-Dura® is easy and safe -- even with bleach. However, a mild soap-and-water solution is all that is required for most spills.

Quick and Easy Cleaning Method

1. Apply a cleaning solution of 1 part soap to 10 parts water to the fabric.
2. Rinse with clear water to remove any soapy residue.*
3. Blot with a clean, dry cloth and allow time to air dry.
4. Repeat as necessary until the stain is gone.

Some stubborn stains may require light agitation with an upholstery cleaning brush or toothbrush. Never use stiff bristles or wire brushes, as they may damage the fabric. To prevent soil build-up, frequent vacuuming is recommended.

***Remember to always rinse with clear water to remove all soap residue. Remaining residue attracts dirt, so if proper rinsing has not occurred, fabrics will get soiled again much more quickly.**

Bleach Cleaning

Because Bella-Dura® is a solution-dyed fabric, the fibers are bleach cleanable without risk of fading or harm, making even more challenging spills easy to treat. Quickly clean and disinfect using a diluted bleach solution. The recommended dilution is four parts water to one part bleach.

Fabric and Fiber Cleanability
